Dual-glass type modules (also called double glass or glass-glass) are made up of two glass surfaces, on the front and on the rear with a thickness of 2.0 mm each. Some manufacturers, in order to reduce the weight of the modules, have opted for a thickness of 1.6 mm. Dualsun has chosen to stay with a thickness of 2.0 mm for reasons explained below.

The ASTRO 6 Twins CHSM66M(DG)/F-BH Series is a high-performance solar panel manufactured by

Astronergy. It features a power output of 645~660W, making it one of the most efficient solar panels available in the market. The panel is designed to provide reliable and consistent performance even in harsh weather conditions, thanks to its robust build quality [...]
