### 8kw inverter output current

What is the maximum input voltage for a 40kW inverter?

The inverter has a maximum input current, such as 40A for 40kW. Only when the input voltage exceeds 550V, the output is likely to reach 40kW. When the input voltage exceeds 800V, the heat generated by the loss increases sharply, causing the inverter to derate the output.

What is the maximum output of a 5kw inverter?

The maximum power output of a 5kW inverteris 5000 watts. If you oversize your solar panel array, it's not unusual for a 5kW inverter to reach up to 5100 watts. However, the nominal output is often considered insignificant.
