### Bifacial 550 photovoltaic modules

What are bifacial photovoltaic modules?

In principle, bifacial photovoltaic (PV) modules are simply PV modules whose full rear contact has been replaced with a fingerprint contact. This means that also the rear of the panel can be exposed to solar radiation and be used to produce power.

Can bifacial PV modules boost the performance of solar power plants?

Bifacial PV modules can boost the performance of PV plants by 25-30% (and even more using reflecting solutions) depending on their electrical behaviour, mounting structures and terrain characteristics. They are perceived as the technology that can be used for future solar power plants as they increase energy yield at a marginally higher cost.

What is a Waaree 550wp dual glass mono PERC bifacial solar module?

The Waaree 550Wp Dual Glass Mono PERC Bifacial Solar Module is a high-performance, cutting-edge solar panel designed for maximum efficiency and durability. With 144 half-cut cells, it provides exceptional power output, even in low-light conditions, making it ideal for a wide range of solar installations. Product Mechanical

What are bifacial and monofacial PV modules?

Bifacial PV module: The existing PV modules are classified under monofacial as they are capable of generating electricity when sunlight is incident on the surface. The other category of PV module is bifacial, and the name itself suggests that the PV module can generate electricity from both sides.

How many watts can a photovoltaic module produce?

In terms of component power,the maximum power of 720 wattshas passed TUV-SUD test certification. 2. Price and cost comparison: Customers will compare the price of photovoltaic flexible modules with conventional crystalline silicon modules and worry that the cost is too high.

What is the average bifacial gain of a power plant?

Average value of NOCT: 44.28 ± 2 °C][Note: The bifacial gain depends on the power plant design and site conditions. Electrical component ratings should be selected as per actual Bifacial gain at site (module currents indicated below)]\*All dimensions are in mm with +/- 2mm tolerance.

LONGi Hi-MO 5: The award-winning PV module by LONGi. The LONGi Hi-MO 5 is one of the most groundbreaking PV modules designed by this company. This solar panel series is manufactured using technological improvements like bifacial, PERC, and half-cut solar cell technology embedded in high-quality monocrystalline silicon (mono c-Si) wafers. To ensure ...

BIMAX5N bifacial TOPCon solar panels could increased power output thanks to its larger cell size (182\*182mm) allows for capturing more sunlight; moreover, with TOPCon technology, it could boasts
