Greece split phase inverter manufacturer

What is inverter country setting?

Inverter country setting: to what country setting the inverter should be configured in order to comply with the local grid requirements. Some countries have a submenu that should be used; sub-entries are indicated with the following symbol: -> SE11400H-US approved only for installations with no LVRT (low voltage ride through) requirement.

Can a transformer connect a supported inverter to a non-supported grid?

In supported countries, connection of supported inverters to non-supported grids is permitted through a transformer, if the secondary connection (transformer connection to the inverter) is identical to a supported grid. NOTE Transformer procurement, installation, maintenance, and support are the responsibility of the installer.

Where can SolarEdge inverters be used?

The SolarEdge inverters can be used in many different countries. This document details countries where SolarEdge approves installation of its inverters. Installation should always be done in compliance with local regulations, and in case of a conflict between local regulations and this document, local regulations apply.

What happens if a transformer fails to install a SolarEdge inverter?

NOTE Transformer procurement, installation, maintenance, and support are the responsibility of the installer. Damage to the inverter due to incorrect transformer installation or use of a transformer that is incompatible with the SolarEdge system will render the SolarEdge warranty invalid.
