

Is Guinea a hub for lithium prospection?

These developments have turned this area in southern Guinea close to the border with Sierra Leone into a hubfor the development of lithium prospection in the country. In April, Guinea Best Minerals applied for two lithium reconnaissance licences close to one of the areas requested by African Lithium, with other companies also expressing interest.

Could lithium-ion batteries provide grid-scale storage?

But that approach is limited by geography, and most potential sites in the United States have already been used. Lithium-ion batteries could provide grid-scale storage, but only for about four hours. Longer than that and battery systems get prohibitively expensive.

Could Guinea's Kissidougou area be a lithium mine?

Previously best known for its diamonds, Guinea's Kissidougou area near the border with Sierra Leone has shown enough potentialto convince one company to explore for lithium there. On 20 April, Global Mining Ressources filed an application for a permit to assess the lithium potential of the area.

Which companies are targeting lithium in Conakry?

Around the same time, from late March to early April, three separate companies that appear to be targeting lithium were registered in Conakry: Guinea Lithium, African Lithium Mining Resources Guinée and Guinean Lithium Ressources.

How much LCoS is pumped hydro compared to lithium-ion battery storage?

That LCOS is about a third that of lithium-ion battery storage and halfthat of pumped hydro. Cetegen cites another interesting finding: the LCOS of their assumed LAES system varied depending on where it's being used.

Can Lees provide long-duration storage if power grids are decarbonized?

They conclude that LAES holds promise as a means of providing critically needed long-duration storage when future power grids are decarbonized and dominated by intermittent renewable sources of electricity.

Utility EWEC (Emirates Water and Electricity Company) has invited developers to submit expressions of interest (EOI) for a 400MW battery energy storage system (BESS) project in the UAE. The EOI process for the greenfield ...

The standard practice of reporting a single LCOS for a given energy storage technology may not provide the full picture. Cetegen has adapted the model and is now calculating the NPV and LCOS for energy storage using ...

The owner of a battery energy storage system (BESS) project in Illinois, US, is seeking at least US\$10 million in damages from LG Energy Solution for supplying allegedly defective batteries, a court document shows. ... 10 ...

With its ultra-large capacity in the ampere-hour range, it is specifically developed for the 4-8 hour long-duration energy storage market. By using ?Cell 1175Ah, the energy storage system integration efficiency increases by 35%, significantly simplifying system integration complexity, and reducing the overall cost of the DC side energy storage system by 25%.

The agreement came off the back of the California Public Utility Commission (CPUC) directing Southern California investor-owned electric utilities to fast-track additional energy storage options to enhance regional energy reliability last year in response to the Aliso Canyon gas leak.. John Zahurancik, AES Energy Storage president, said: "These two projects, ...

It is located at Poolbeg Energy Hub, where ESB - around 95% owned by the Irish state with the remaining stake held by its employees - is planning to deploy a combination of clean energy technologies, including offshore wind, hydrogen, and battery storage, over the coming decade. "Energy storage like this major battery plant at the ESB"s ...

A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we have reported on this year. It's been a positive year for energy storage in 2023, with new markets opening up and supply chain bottlenecks and price spikes for battery energy storage systems (BESS) easing, though challenges remain.

Image: Harmony Energy. Alex Thornton, operations director at Harmony Energy, gives us a deep dive into Pillswood, the biggest battery storage project in Europe, including the bold decision to be an early-mover into 2-hour lithium-ion BESS, in a market of much shorter duration assets.

Papua New Guinea minigrid tender specifications. The tender calls for the development of a 1 MW solar-plus-storage minigrid that includes a 1 MW ground-mounted solar array, a 2 MW/2.5 MWh lithium-ion battery energy storage system (BESS), and a 1 MVA 22 kV/400 V distribution transformer.

Responding to Energy-Storage.news" request for comment after our story was published, CPA confirmed the project"s choice of lithium-ion technology and that it would be a 75MW/600MWh system. It has not yet been

The Xinhua Ushi ESS Project is a 4-hour duration project using vanadium redox flow battery (VRFB) technology, one of the more commercially mature long-duration energy storage (LDES) technologies available on the market today. The project will enhance grid stability, manage peak loads and integrate renewable

energy, Ronke Power said on its website.

But shortages in lithium carbonate may open up an opportunity for non-lithium batteries which can at least partially slot in to lithium battery production lines. The founder of potassium-ion battery startup Alex Girau ...

The award of the preferred bidder. The Red Sands project was not initially named as a preferred bidder on November 30 2023, when Gwede Mantashe, the South African Minister for Minerals Resources and Energy announced the first four preferred projects selected following Bid Window One (BW1) of South Africa's BESIPPPP. The four projects announced by the minister ...

Image: Long Duration Energy Storage (LDES) Council. The capabilities of lithium-ion battery storage in providing long-duration energy storage to global energy systems should ...

Envision Energy is preparing to reveal lithium-ion (Li-ion) battery energy storage system (BESS) technology for long-duration applications. ... Sineng Electric enhances grid stability with commissioning of ...

It uses lithium iron phosphate (LFP) battery cells. "We"re pleased to see this landmark project complete construction and come online. Battery storage is critical for the stabilisation of the country"s electric grid and

Duke Energy 11MW/11MWh battery storage project, despite modest size, is thought to be the largest project of its type in North Carolina. ... that project has since been repowered with lithium-ion batteries. Duke also built North Carolina's previous holder of the largest BESS title, a 9MW project in the city of Asheville switched on in 2020. ...

Two years ago, Energy-Storage.news reported on the first phase of a 200MW/800MWh vanadium redox flow battery (VRFB) coming online. Recently published statistics from China's National Energy Administration said ...

Lightsource bp has announced that it has been granted full planning permission for its first UK standalone battery energy storage system (BESS). The Pentir Energy Storage project, to be located near Bangor in ...

The Daggett Solar Power Facility - Battery Energy Storage System is a 450,000kW lithium-ion battery energy storage project located in San Bernardino, California, the US. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2019 and will be commissioned in 2024.

Strategies such as improving the active material of the cathode, improving the specific capacity of the cathode/anode material, developing lithium metal anode/anode-free lithium batteries, using ...

Battery storage developer and operator Spearmint Energy has secured US\$250 million for two battery energy storage system (BESS) projects located in Texas, US, totalling 400MWh. ... with UK, India partnerships. April 17, 2025. US non-lithium battery technology companies Eos Energy Enterprises and Unigrid have announced partnerships to deploy ...

The project has seen its capacity increase - from the original 4.1GWh of storage and 1GW of solar - last month when the Spanish IPP acquired 1GW of solar PV capacity and 1GW of energised line from gas and oil giant Repsol and renewables developer Ibereólica. "The expansion of Oasis de Atacama, the world"s largest battery project, aligns with Grenergy"s ...

These power plants, with a capacity in the megawatt range, will incorporate photovoltaic (PV), battery energy storage systems (BESS), and diesel gensets. As owner's engineer, Fichtner ...

Could Guinea"s Kissidougou area be a lithium mine? Previously best known for its diamonds, Guinea"s Kissidougou area near the border with Sierra Leone has shown enough potential to ...

Owner Vistra Energy has announced the completion of work to expand its Moss Landing Energy Storage Facility in California, the world"s largest lithium battery energy storage system (BESS) asset. Power generation and retail company Vistra said yesterday (1 August) that the Phase III expansion achieved the start of commercial operations near ...

The company's 400MW/2,400MWh Chickerell battery energy storage system (BESS) project was voted in favour of by six votes to two this week (29 July) at a Dorset Council meeting, according to numerous news reports. ... The project had been controversial amongst locals for its size and the fire risk that lithium-ion batteries present, but ...

The Nongong Substation Energy Storage System is a 36,000kW lithium-ion battery energy storage project located in Dalsung, Daegu, South Korea. The rated storage capacity of the project is 9,000kWh. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2016 and will be commissioned ...

RWE"s 249MWac Limondale PV plant. The 8-hour battery project will be built on an adjacent site. Image: RWE. RWE will proceed with an 8-hour duration large-scale battery storage project in New South Wales (NSW), while a tender for more long-duration resources has launched in the state.

The UAE should deploy 300MW/300MWh of battery energy storage system (BESS) capacity in the next three years, according to utility EWEC. ... Net Zero by 2050 strategic initiative whilst supporting the realisation of the Abu Dhabi Department of Energy"s Clean Energy Target 2035." Large-scale lithium-ion BESS deployments have been few and far ...
