However, high-frequency inverters have low no-load loads, cannot connect fully loaded inductive load electrical equipment, and have relatively poor overload capacity. Therefore, in terms of load capacity, industrial frequency inverters are better than high-frequency inverters (high-frequency inverters &gt; industrial frequency inverters)

A High Frequency Inverter for Variable Load Operation Weston D. Braun and David J. Perreault Massachusetts Institute of Technology, Cambridge, MA, 02139, USA Abstract--Inverters operating at high frequency (HF, 3-30MHz) are important to numerous industrial and commercial applications such as induction heating, plasma generation, and
