For larger tools that require them, it's not enough to simply tap into the temp power pole or a nearby outlet. You have to ensure that if your tool requires 15 amps, it gets 15 amps. Use an extension cord that doesn't carry the correct thickness (gauge) wire and you "starve" your tool. But, you also do something worse.

Quick Answer: For simple overnight camping with just phone charging and basic lights, 100-200 Wh is sufficient. For weekend trips with multiple devices per person, 500-800 Wh will be ideal for most families.
