

London containerized generator sets

Can a containerised generator power a construction site?

At Dale, we have a wide range of containerised generator units that can power everything from a construction site to a hospital and even large scale events. Dale's containerised generator units are able to offer bespoke designed solutions to meet your specific site requirements.

Why should you choose a containerised generator?

Power Management: Synchronisation capabilities for multi-generator setups. Our containerised generators provide critical power backup for MOD, HS2, HMP sites, as well as for sectors like construction and agriculture. These sets are particularly suited for M&E contractors, offering reliable and efficient power solutions for demanding applications.

What is a containerised generator?

With sound proofing by means of the acoustic lined container that is both lockable and weather proof - these are usually installed outside a building in a car park or outside the intake room. Containerised generators are usually larger generators above 500kVA and upward, and are 80dbA @1 metres noise level. We can make these even more silent.

How many kVA can a container house a generator?

These containers house generators ranging from 800kVA to 3000kVA, available in 20ft, 40ft, and 45ft sizes, tailored to fit your specific needs. Contact us today to discuss your requirements. In addition to our standard range, we offer custom-manufactured containers tailored to your specific needs.

What BS 7671 standards does a container house generator have?

All wiring is designed to meet BS 7671 standards, ensuring compliance and reliability. These containers house generators ranging from 800kVA to 3000kVA, available in 20ft, 40ft, and 45ft sizes, tailored to fit your specific needs. Contact us today to discuss your requirements.

Do you offer custom-manufactured containers?

In addition to our standard range, we offer custom-manufactured containers tailored to your specific needs. These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs.

Container Design: Built to international container standards, generator sets up to 1000KVA use 20-foot containers, while larger sets (over 1250KVA) are housed in 40-foot containers.; **Transportation Efficiency:** CSC-certified to meet the International Convention for Safe Containers, allowing direct shipment as standard containers and reducing transportation costs.
