A Portable Uninterruptible Power Supply (UPS) is a game-changer for both individuals and businesses, ensuring that electronic devices remain operational during power outages or

An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter--which turns the battery's stored energy into usable power--wrapped into one unit.

This powerful, pure sinewave UPS system delivers cleaner, more stable power for protecting high-end electronics. It combines 10 power outlets with surge protection (six with battery backup) and 900 watts of power to keep power-hungry devices like desktop PCs and monitors running for quite some time.

Uninterruptible Power Supplies (UPS) Computer and IoT. Power protection and battery backup for computer systems, office equipment, Point-of-Sale, networking, and other electronics. Network and Server. Complete power protection and battery backup for business network equipment, servers, storage, and other critical equipment.
