hospital equipment, data centers, telecommunication equipment or other electrical equipment where an unexpected power disruption could cause injuries, fatalities, serious business disruption, financial losses, privacy breaches or data loss.

What is a UPS Power Supply? A uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides you with emergency power to a load when the input power source or mains power fails in cases of power outages or load shedding. A UPS differs from an emergency power system or standby generator as it provides near-instantaneous ...

Unlike a backup generator, it does not need to power up in order to start generating power. In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection.

Battery Backup Time - How Long Will The Uninterruptible Power Supply (UPS) Run When The Power Goes Out? A lot of people are confused by this and think that the capacity rating of the battery backup UPS (for example 1 kVA / 700 Watt) determines the amount of battery backup power time they will have during an outage. IT DOES NOT.

Uptech has extensive experience in Uninterruptible Power Supply and backup power solutions, with more than twenty years of uninterruptible power system expertise in the industry within South Africa, originating in Pretoria..
