

Does Sao Tome & Principe have solar power?

Renewable energy represents only 5% of the country's electricity mix. According to the latest set of global statistics produced by the IRENA,Sao Tome and Principe did nothave any grid-connected solar PV facility at the end of 2021. This is about to change after the completion of the solar plant at Santo Amaro.

Will Sao Tome & Principe build a solar plant in Santo Amaro?

The Government of Sao Tome and Principe has launched a tender to build a 1.5 MWp solar photovoltaic plant in the town of Santo Amaro in the Lobata District. The African Development Bank (AfDB) is financing the solar plant which is set to become the first grid-connected solar project for the country.

What is the Global OTEC Dominique project?

The Global OTEC Dominique project,off the coast of São Tomé and Príncipe,has the potential to alter the energy demands of island nations significantly. The Dominique project by Global OTEC aims to bring sustainable energy to island nations.

How much energy does OTEC use?

This is important, as previous OTEC projects have used a great deal of the energy they generate to run the pumps that bring the cold water to the surface. In 1981, the Tokyo Electric Power Company built an OTEC plant in Nauru that generated around 120 kW of energy, but used around 90 kW of that to run the plant.
