

Solar luminous power system

What types of solar solutions do luminous offer?

At Luminous, we offer all types of custom solar solutions for on-grid and off-grid solar power systems from 3kWp to 1MWp. Not only do we provide high-grade solar PV panels, but we also offer top-quality components designed to make solar solutions more efficient, cost-effective, and long-lasting.

What is included in luminous Solar System?

Included GST, transportation and Installation. 5kW Luminous off grid solar system is complete solar COMBO with 15 nos. X 335 watt solar panel, 5.5kVA solar inverter, 8 nos. X 150 Ah solar battery, mounting structure, wires, nut-bolts and other solar accessories that can run basic load of your home, business, school etc.

What are the features of luminous solar power systems?

It has the following features: Add-On Safety Features- While solar power systems come equipped with certain safety measures, Luminous' solar solutions offer add-on safety features such as junction boxes, Surge Protection Devices (SPDs), and lightning arrestors.

Why should you choose luminous solar?

Choose Luminous and get one step closer to your solar journey! Get best price solar off grid system, grid tie inverter and solar electronics at solar by Luminous. We offer reliable, safe and efficient solar electric system and solar products for home using latest solar technology.

What types of solar rooftop systems does luminous offer?

Luminous offers a wide range of solar rooftop solutions. You can choose from DC-based systems, AC based systems with backup (off-grid solar system), AC based systems without backup (grid-connected solar system) and AC based systems with both back-up and savings (Hybrid solar system).

What is luminous solar charge controller?

millions of customers.

Mono PERC half-cut solar panels consist of solar cells that are cut in half in order to improve the panel's performance and durability. When the panels are halved, the current also gets halved, which reduces the resistive losses and allows solar cells to produce more power. All this leads to increased efficiency and greater durability.
