

Octopus Group's first standalone battery energy storage system (BESS) project in Australia has won local approval in Queensland. ... with plans to connect to transmission operator Powerlink's network via an existing 275kV substation in Swanbank. The asset will play into the interconnected National Electricity Market (NEM) and Octopus said ...

The project is the first utility-scale energy storage plant to be built in Suriname and Wärtsilä"s first in the Latin American country. Once operational in late 2022, the project will help reduce the need for emergency back-up ...

The four-hour BESS project, which will have a power rating of 40MW and an energy storage capacity of 160MWh, will be built at the Tobène substation in Thies and operated in tandem with Infinity Power's 158.7MW ...

Arizona Public Service (APS), the state"s largest utility company, has signed a number of big third-party contracts with battery storage developers or owners this year, including a 20-year tolling agreement for a 255MW/1,000MWh BESS with Strata Clean Energy signed in May and another for a 1,200MWh project with Canadian Solar subsidiary ...

The technology group Wärtsilä will supply a 7.8 MW/7.8 MWh energy storage system to a leading gold mining company to help achieve its climate targets and decarbonisation goals at a mine in Suriname. This is the ...

The 40MW system may be at the Black Mesa solar facility in Elmore County, while the larger project could adjoin the Hemingway substation near the city Melba, although other sites are being considered for both. ... The state is seeking 1,700MW of energy storage and more than 2,100MW of solar and wind capacity by 2040, ...

The project was first announced in 2018, with another 100MW project at Shannonbridge also unveiled. Together, the two battery energy storage systems (BESS) were set to involve a EUR150 million (£135 million) combined investment, creating 240 jobs during construction and 10 subsequent to the systems going into operation.

In addition to owning those projects and the Bolster substation project in Peoria, SRP has also signed long-term contracts for the outputs of two large-scale battery projects under construction: one is the Sonoran Energy Center, which will have a 250MW solar PV array and a 1GWh BESS and the other, Storey Energy Center, will be an 88MW solar ...

System integrator Ameresco has completed and put into commercial operation eight battery energy storage system (BESS) projects for US utility United Power in Colorado. The projects are located at eight different substations operated by the utility and total 78.3MW of power and 313.34MWh energy storage capacity, an average discharge duration of ...

Company to start building 45MWh project in Netherlands . Giga Storage has also said it will start building its Giraffe project in the Netherlands, its home market, this summer. The project in Westhavenweg has an energy ...

The specialist global investment manager revealed the Kent-based project, which consists of 373MW of solar and "more than" 150MW of battery energy storage, is expected to be fully completed by the end of 2024. Once complete, Cleve Hill Solar Park will consist of 880,000 solar panels and battery storage.

Utility Public Service Company of New Mexico"s (PNM) plan to procure energy from 950MW of solar and storage facilities by 2022 and replace its retiring 562MW San Juan Generating Station coal plant has been handed a boost. ... Electrical Consultants Inc will design the project"s substation and switchyard and one of its subsidiaries, EPC ...

As previously reported by Energy-Storage.news, the two projects will be in Kiisa in the Saku Rural municipality and Arukylä in the Raasiku Rural municipality and will provide emergency reserve power. Kiisa is the location of an emergency power plant operated by TSO Elering. The battery energy storage park and its substation will be connected to the electricity ...

Enter the energy storage power station Suriname concept, poised to become the Swiss Army knife of the country"s energy system. Let"s unpack why this solution is making engineers do ...

Councillors in Dorset, UK have reportedly approved one of the largest BESS projects in the world, from developer Statera Energy. The company's 400MW/2,400MWh Chickerell battery energy storage system (BESS) project was voted in favour of by six votes to two this week (29 July) at a Dorset Council meeting, according to numerous news reports.

This is the first utility-scale energy storage system to be built in Suriname and Wärtsilä"s first energy storage project in the country. The order was booked to Wärtsilä order intake in Q4, 2021. The facility is expected to ...

A 60MWh battery energy storage project co-located with an existing solar PV plant has been proposed in Spain, the latest to qualify for a recently-announced EUR150 million (US\$160.7 million) package of grants. ... is "in operation" and has "permission and connection to the transmission grid at the Brovales 400 kV electrical substation ...

Delorean Power and the Holden Municipal Light Department have unveiled a new battery storage project in the state of Massachusetts. ... HMLD plans to add the new storage system to what it calls its "newly rebuilt" Chaffins substation in the town of Holden, and the company's portfolio of power generation facilities, of which 60% are what ...

The second phase of the contracted Suriname village micro-grid photovoltaic project includes: the design, procurement and construction of 5 centralized micro-grid photovoltaic power stations ...

Aerial overlay of where the project will be located on Milwaukee's North 84th Street, from plans submitted by the developer. Image: Black Mountain Energy Storage. Developer Black Mountain Energy Storage has won approval ...

A joint venture (JV) between the two Chinese companies will deliver the 54MW/54MWh Ombuu battery energy storage system (BESS) project in Namibia's Erongo Region, at the existing Omburu Substation. Construction is expected to take around 18 months for the project to come online in the latter part of 2025.

Construction underway on the Sierra Solar and Storage project, which NV Energy will own, while it is contracting with IPPs for other clean energy projects. Image: NV Energy via Instagram. ... 5,141 acres of BLM-managed public land connecting to NV Energy"s electricity grid via the utility"s Fort Churchill substation in Lyon County, Nevada. ...

Ingeteam has announced that it was supplier of the full battery energy storage system (BESS) solution to Spain"s first-ever solar PV plant equipped with energy storage from commissioning. ... The company is also responsible for digital protection and controls at the site"s substation. ... European Investment Bank has committed EUR108 ...

Energy-Storage.news provided a detailed look at where winning projects were located within Spain in our coverage of the auction results. Some 186MWh of the energy storage projects awarded funding are located in the Canary Islands. Iberdrola didn't reveal which company would provide the lithium-ion BESS units for the six projects.

The SDG& E Escondido Substation - BESS is a 30,000kW energy storage project located in Escondido, California, US. The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The project was ...

Welcome to Suriname, where tropical rainforests meet cutting-edge battery tech. In the past two years alone, Suriname has attracted over \$200 million in renewable energy investments - and ...

Jim Barrett, senior project manager for construction for NextEra Energy, talks about the new battery storage

and substation expansion at Colorado Springs Utilities" Jackson Fuller substation ...

The Buzen Substation - BESS is a 50,000kW energy storage project located in Buzen, Fukuoka, Japan. The electro-chemical battery energy storage project uses sodium based as its storage technology. The project was announced in 2015 and was commissioned in 2016.

The GS Yuasa-Kita Toyotomi Substation - Battery Energy Storage System is a 240,000kW lithium-ion battery energy storage project located in Toyotomi-cho, Teshio-gun, Hokkaido, Japan. The rated storage capacity of the project is 720,000kWh.

A 225MWp / 450MWh battery energy storage system (BESS) project has been granted development approval by the Minister for Planning and Local Government in South Australia. ... with its proposal including constructing onsite substation and transformer equipment as well as transmission line infrastructure to connect to the 330kV South Para substation.

RWE proceeds with 8-hour battery storage project as New South Wales (NSW) tenders for another 1GW of long-duration storage. ... (FID) on the 50MW/400MWh battery energy storage system (BESS) project, adjacent to ...
