

Do you need a power outlet in a house?

No house is complete without power. You need electricity to power your appliances, so you will most likely install power outlets in weird places in your home. What if you have electronics or appliances outside? How do you weatherproof outdoor power outlets? Read this article for nine ways to weatherproof outdoor power outlets. 1.

#### How much power does an outbuilding need?

What you plan to do in the outbuilding will dictate the power required. If all that is needed is a socket or two and some lighting, then the power requirements are fairly modest, a 13Asupply would probably be more than adequate.

#### Can you use power outlets outside?

It is very possible to make use of power outlets outside. You just need to weatherproof them so that they can keep working after a storm. Remember to think about your safety and that of your family first when handling power outlets and appliances, especially those outside.

### Why do you need an exterior socket?

Correctly installed,an exterior socket is a very useful facility to have. It means you no longer have to run extension leads from inside the house, with the potential for tripping over them! It enables you to run electric garden equipmentsuch as a lawn mower, hedge trimmer and various other items including power tools, in a far safer way.

### Is a permanent power outlet necessary?

For lighting, lawn tools used on a regular basis, or power needs for outbuildings, you need a permanent power solution for safety. This can involve an outdoor outlet addition to your home's main structure, or wiring run remotely to an outbuilding.

#### Where should an outdoor socket be installed?

In fact it is wise to have one at the back and one at the front of the property, which can be used for car washing equipment, power washers and other items such as vacuum cleaners. In this DIY guide we go through the steps involved in how an outdoor socket is installed.
