What is a Sol-Ark 60k-3p 480v-n?

The Sol-Ark 60K-3P-480V-N is a 60,000 watt (60kW) three-phase 480Vac output and 97.5% efficiency hybrid inverterthat works grid-connected or off-grid for most commercial installations.

What is an off grid solar power system?

Off grid solar power system doesn't connect to the power grid. In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter.

How much power can a solar inverter convert?

This powerful inverter is capable of converting up to 78,000 Wof solar power into 60,000W of continuous three-phase AC power. Equipped with four MPPT trackers,the Sol-Ark 60K-3P-N 480V allows for the management of multiple PV strings across a broad voltage range of 160V - 800V.

An on-grid inverter's main job is to convert DC power generated from the PV array into usable AC power. Hybrid inverters go a step further and work with batteries to store excess power as well. In the developing world, hybrid inverters are more of a necessity to compensate for weak or intermittent grids or a lack of grid electricity all together.
