#### **Zagreb Energy Storage Enterprise**

Will ie-energy be the biggest energy storage project in southeastern Europe?

Croatia got the green light from Brussels to give a EUR 19.8 million grant to a domestic startup for a massive energy storage project. IE-Energy is planning to build a battery system of 50 MW, which means it would be the biggest in Southeastern Europe.

Did Croatia get the green light for IE-energy's massive energy storage project?

Croatia got the green light from Brusselsfor a EUR 19.8 million grant to IE-Energy for a massive energy storage project.

How much ie-energy aid will Croatia get?

The European Commission has approved EUR19.8 million(US\$20.1 million) in state aid from the government of Croatia to energy storage operator IE-Energy for a series of grid-connected projects. The aid will be a direct grant to IE-Energy and will cover approximately 30% of capital expenditures for a series of grid-scale battery energy storage systems.

Is there a storage facility in southeastern Europe?

There is no storage facilityin Southeastern Europe yet with such a capacity. Of note,a 250 MW project is under development in Turkey, with an envisaged capacity of 1 GWh. The batteries would be used for balancing services for the independent Transmission System Operator in Croatia (HOPS), domestic media reported.

Will ie-energy build the biggest battery system in southeastern Europe?

IE-Energy is planning to build a battery system of 50 MW, which means it would be the biggest in Southeastern Europe. The European Commission has approved, under the European Union's aid rules, a EUR 19.8 million Croatian aid measure in favor of energy storage operator IE-Energy.

Will ie-energy boost storage capacity in southeastern Europe by 2024?

Moreover,IE-Energy said it would boost the system to 50 MW and 110 MWh by 2024. There is no storage facility in Southeastern Europe yet with such a capacity. Of note,a 250 MW project is under development in Turkey, with an envisaged capacity of 1 GWh.

Specifically, at the thermal storage temperature of 140 ?, round-trip efficiencies of compressed air energy storage and compressed carbon dioxide energy storage are 59.48 % and 65.16 % respectively, with costs of \$11.54 × 10 7 and \$13.45 × 10 7, and payback periods of 11.86 years and 12.57 years respectively.
